The following table provides information regarding the environmental performance of the Company's operations. The data is presented in U.S. dollars unless otherwise indicated. The Company's operations are subject to various environmental regulations, including those related to air quality, water quality, and hazardous waste management. The Company has implemented a comprehensive environmental management system to ensure compliance with these regulations and to minimize the environmental impact of its operations.

The table below summarizes the Company's environmental performance metrics for the years 2005, 2006, and 2007. The metrics include greenhouse gas emissions, water consumption, and hazardous waste management. The data is presented in U.S. dollars unless otherwise indicated.

Metric	2005	2006	2007
Greenhouse Gas Emissions (Scope 1 & 2)	1,500,000 lbs	1,800,000 lbs	2,100,000 lbs
Water Consumption (Gallons)	10,000,000	12,000,000	14,000,000
Hazardous Waste (lbs)	500,000	600,000	700,000

## Environmentally Sustainable

The Company is committed to environmental sustainability and has implemented a comprehensive environmental management system. This system includes policies, procedures, and controls designed to minimize the environmental impact of the Company's operations. The Company's environmental management system is based on the following principles:

- Compliance with all applicable environmental laws and regulations.
- Minimization of greenhouse gas emissions and other pollutants.
- Conservation of water and other natural resources.
- Proper management and disposal of hazardous waste.
- Continuous improvement of environmental performance.

The Company's environmental management system is subject to regular audits and reviews to ensure its effectiveness. The Company is committed to transparency and will continue to report on its environmental performance to its stakeholders.
